DETAILED ACTION

Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-18, 20 and 21, drawn to a press apparatus, classified in class 100, subclass 280.

II. Claim 19, drawn to a method of varying the slide motion in a running press, classified in class 100, subclass 35.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as one without including zero crankshaft velocity while the press drive system is operating.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different

classification, and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Information Disclosure Statement

6. Receipt is acknowledged of an Information Disclosure Statement (I.D.S.), filed 26 July 1999, which I.D.S. has been placed of record in the file. An initialed, signed and dated copy of the form PTO-1449 is attached to this Office action.

Drawings

7. Please note the attached Notice of Draftsperson's Patent Drawing Review (Form PTO-948) regarding the drawings filed 19 March 1999.

Response to Preliminary Amendment

8. Receipt is acknowledged of a preliminary amendment, filed 26 July 1999, which has been placed of record and entered in the file.
